

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A drawer guide rail assembly mounted for a guided and stabilized in and out movement with respect to a furniture member comprising:

a fixed guide for attachment to an inner sidewall of said furniture member and having at least one running surface;

an intermediate pull out channel capable of sliding back and forth relative to said fixed guide on said running surface of said fixed guide, ~~the~~ an upper surface of said intermediate pull out channel section providing a second running surface;

a first roller bearing positioned within said intermediate pull out channel for enabling sliding movement of said intermediate pull out channel on said fixed guide;

an outer pull out channel for attachment to an undersurface of a drawer capable of sliding back and forth on said intermediate pull out channel relative to said intermediate pull out channel; and

a second roller bearing positioned within said outer pull out channel for enabling sliding movement of said outer pull out channel on said intermediate pull out channel; wherein said fixed guide running surface is a T-shaped flange extending upwards; said drawer guide rail assembly further comprises a ~~stabilizing means~~ stabilizer positioned between said intermediate pull out channel and said

outer pull out channel; ~~and said stabilizing means~~ stabilizer is mounted on top of the intermediate pull out channel, and includes a shoulder which is horizontally extended from each side of said ~~stabilizing means~~ stabilizer to be fitted with said second roller bearing for guiding and stabilizing the movements of said outer pull out channel relative to said intermediate pull out channel; and the second roller bearing is disposed over the stabilizer.

2. (Currently amended) The drawer guide rail assembly as claimed in claim 1, wherein said ~~stabilizing means~~ stabilizer is in the form of a metal sheet having inclined sides.

3. (Currently amended) The drawer guide rail assembly as claimed in claim 2, wherein said ~~stabilizing means~~ stabilizer has its width wider than the width of said intermediate pull out channel.

4. (Currently amended) The drawer guide rail assembly as claimed in claim 3, wherein said ~~stabilizing means~~ stabilizer includes a protrusion formed at the upper end of said ~~stabilizing means~~ stabilizer for retaining said second roller bearing in position during movement.

5. (Currently amended) The drawer guide rail assembly as claimed in claim 1, wherein said ~~stabilizing means~~ stabilizer is detachably positioned between said intermediate pull out channel and said outer pull out channel.
